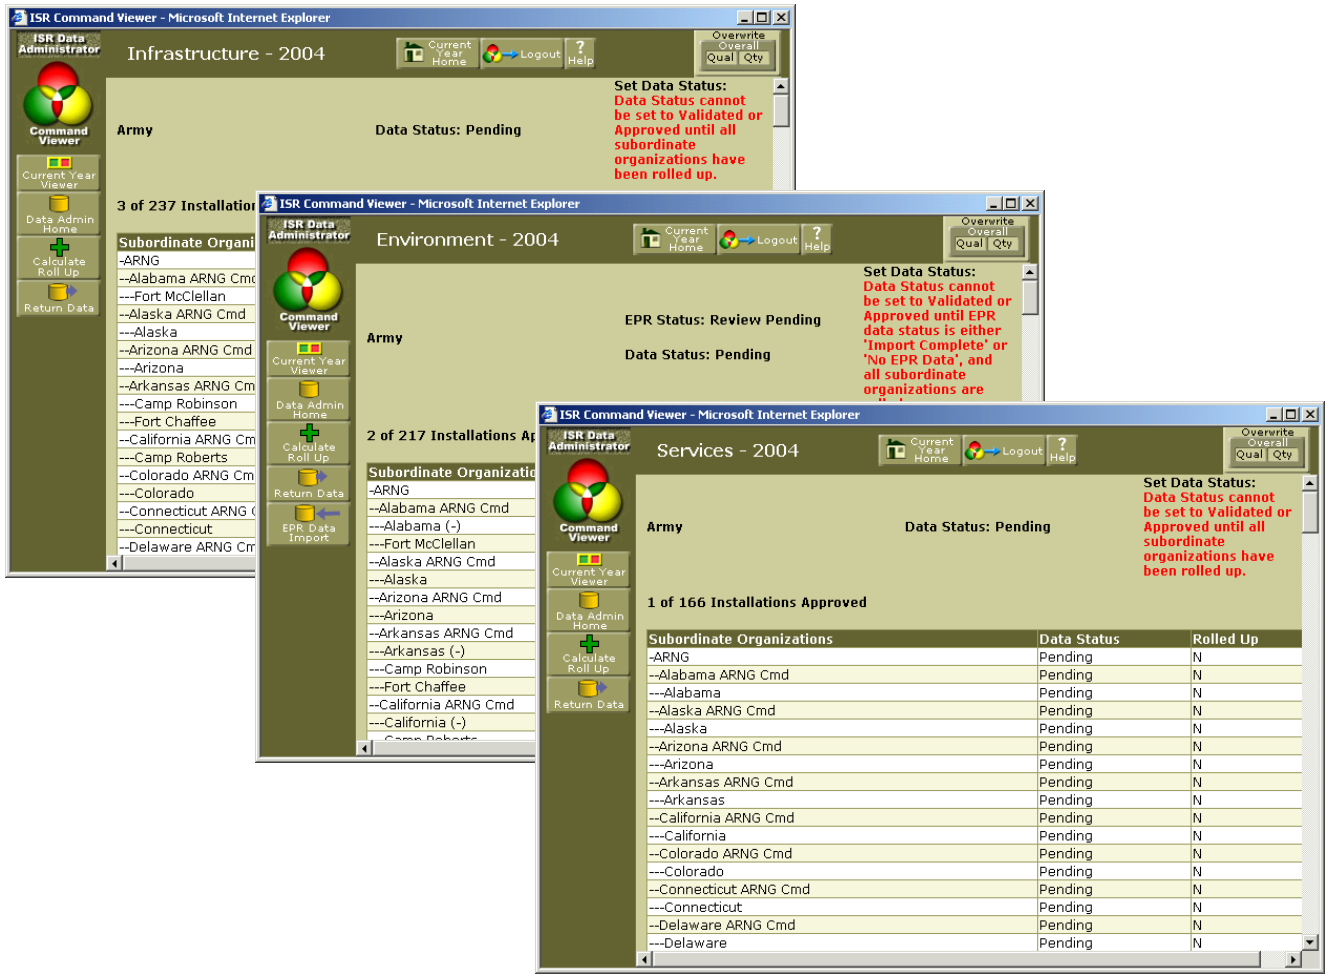
CV - Data Administrator

The Data Administrator for all ISR Components will operate as part of the ISR Web Application in 2003 and can be found in the Current Year Data Section of the ISR Command Viewer.



CV - Data Administrator Functions

Tool for moving ISR Current Year Data up the chain of command

- ***Produce (calculate) command level ratings from installation data (Rolling Up Data)***
- ***Add comments/overwrites by BSB, Sub-command, & MRO commanders***
- ***Validate data***
- ***Return Data to subordinate Installations or Commands for correction***
- ***Approve Data so next Higher HQ can act on data***

CV - Data Administrator
User Roles

3 Types of ISR Command Viewer Current Year Roles:

- ***View Only** – Users who can view data, but cannot perform Data Administrator functions. These users will not see the Data Administrator button in the Status View.*
- ***Validators** – Users who can View data, and can perform the following Data Administrator functions: Import Cmd Specific EPR Data (Env), Calculate Status Ratings, Return Data, enter or edit Comments and Overwrites and set data status to validated.*
- ***Approvers** – Users who perform all the functions of a Validator and they can set the*

CV - Data Administrator

- *Status View. Displays C-Ratings for User's org and Child Orgs*

- *Main Data Admin Screen: - View Child Org Status (Command Level Only), Set Data Status*

- *Calculate ratings*

- *Enter comments and overwrites at Facility Class Level*

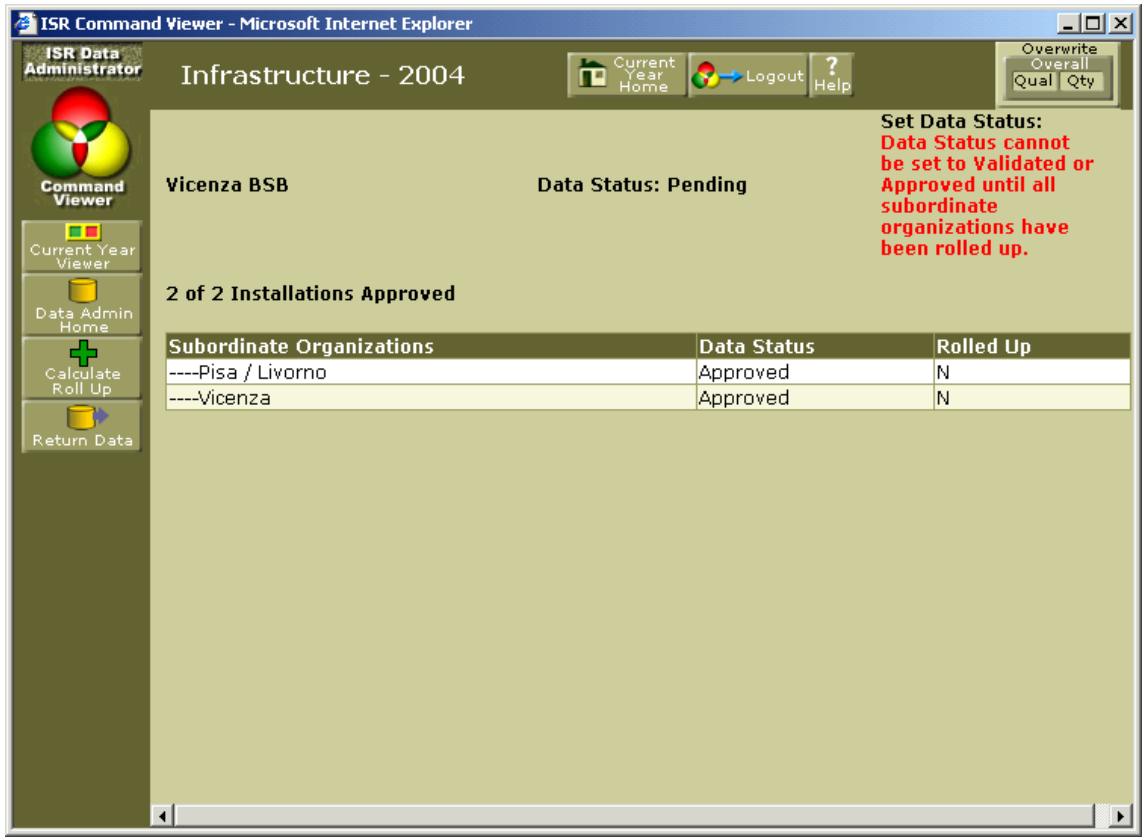
- *Enter comments and overwrites at Category Level*

- *Return Data to child orgs for revisions*

- *Set Data Status to **Validated** or **Approved**. **Approved** status makes data available to higher headquarters.*

CV - Data Administrator

Data Admin Home Page (Infrastructure Command Level)



- ***View own Org Status***
- ***View Status of all Child organization data***
- ***Navigate to other Data Admin Screens or Current Year Viewer using Menu buttons***

CV - Data Administrator

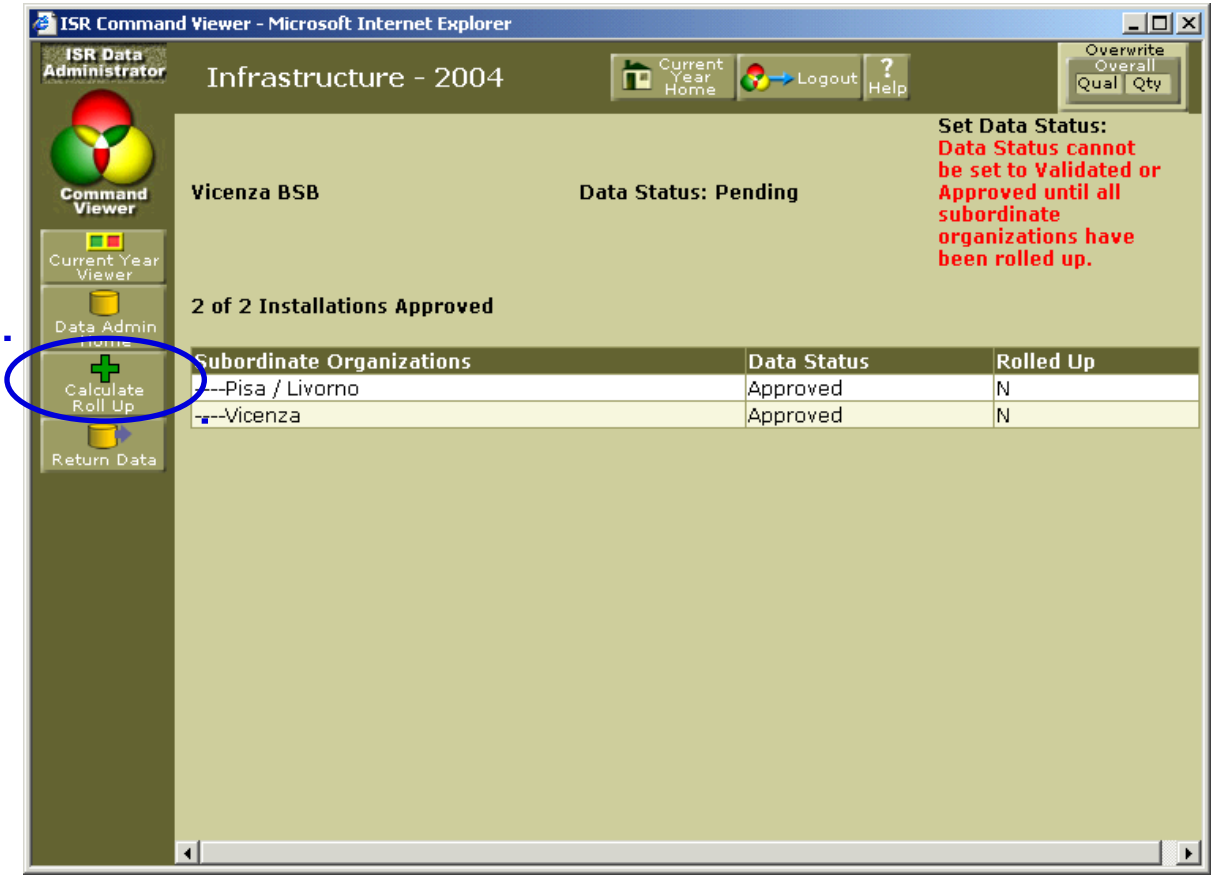
Data Admin Home Page (Infrastructure Command Level)

Data Admin Home

Initial view after child org approves data

CV - Data Administrator

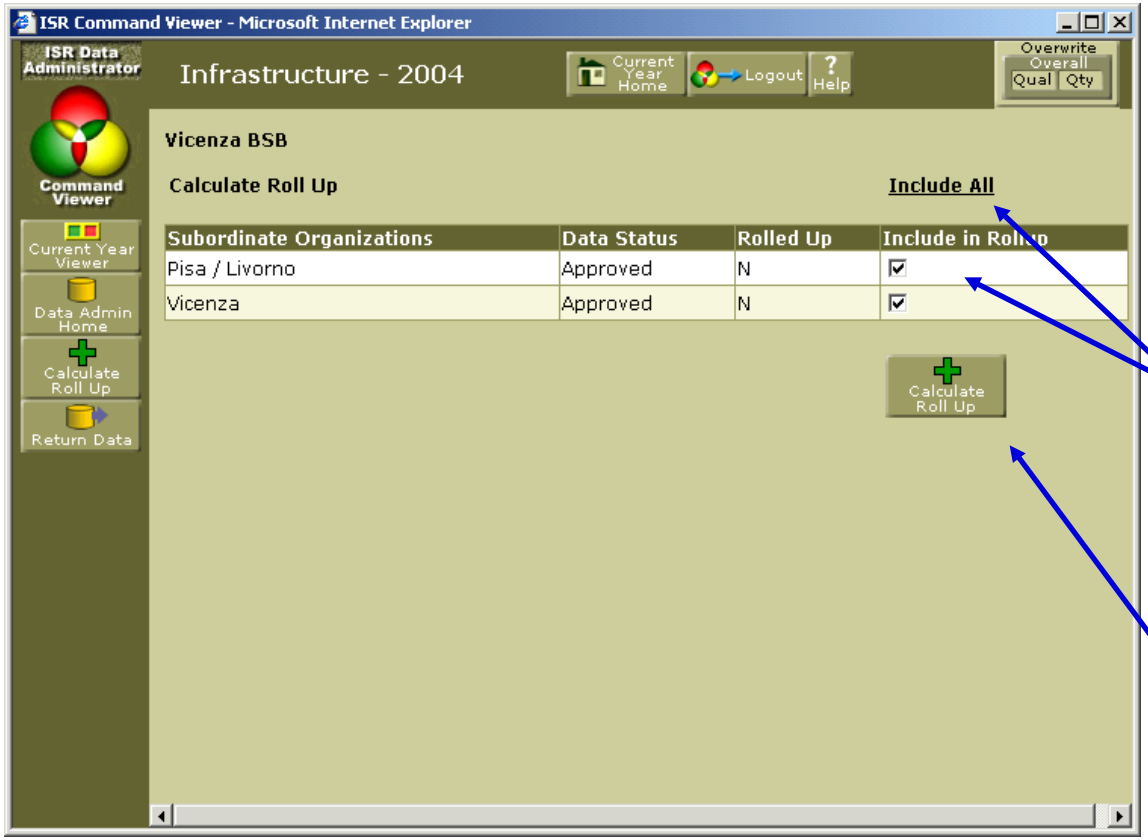
Calculate Roll Up



- ***To run a calculation, click the Calculate Roll Up button. However…***
- ***Cannot run calculate routine if no child orgs have approved their data.***

CV - Data Administrator

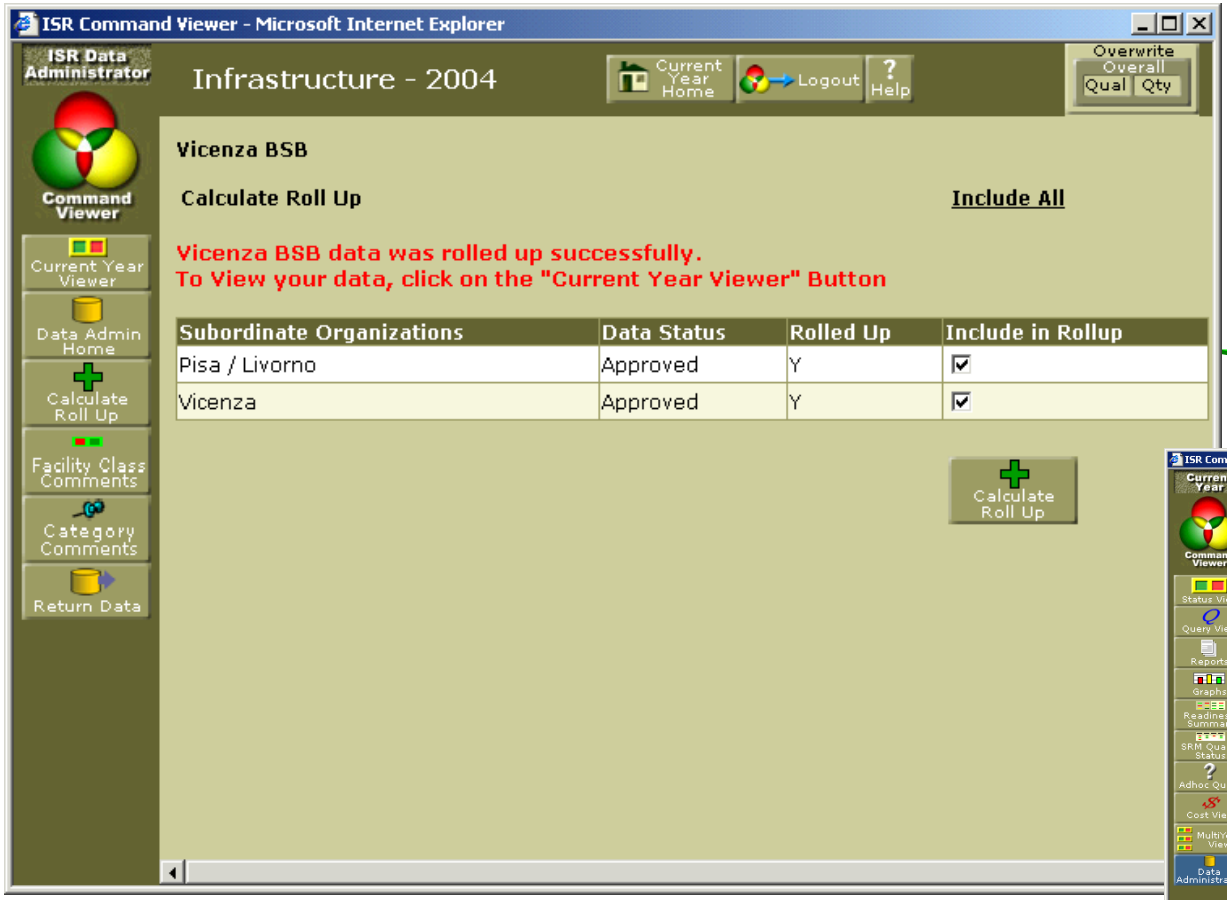
Calculate Roll Up



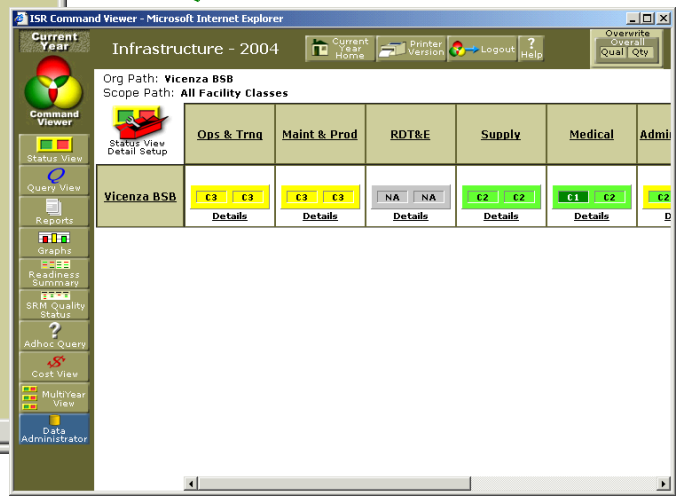
- ***Only immediate Child Orgs shown on the Calculate Roll Up page.***
- ***Calculate command ratings/data***
- ***Can select individual orgs using the check boxes or click the Include All link.***
- ***Once selections are made, click the Calculate Roll Up button***

CV - Data Administrator

Calculate Roll Up



- ***Successful rollup***
- ***Command ratings now visible in Status View***
- ***Calculating does not change Data Status.***



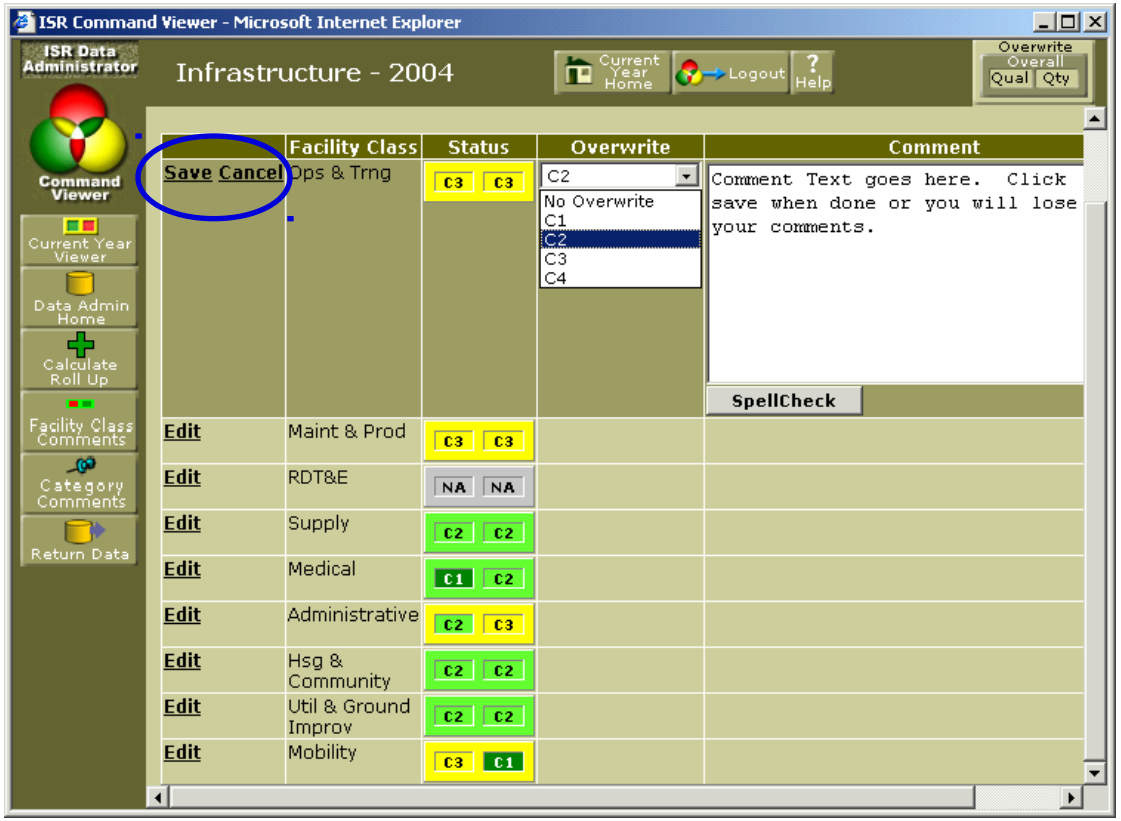
CV - Data Administrator

Comments and Overwrites

- ***Allows commanders to include comments or to overwrite C-Ratings at the Facility Class level.***
- ***Overwrite does not affect calculated ratings.***

CV - Data Administrator

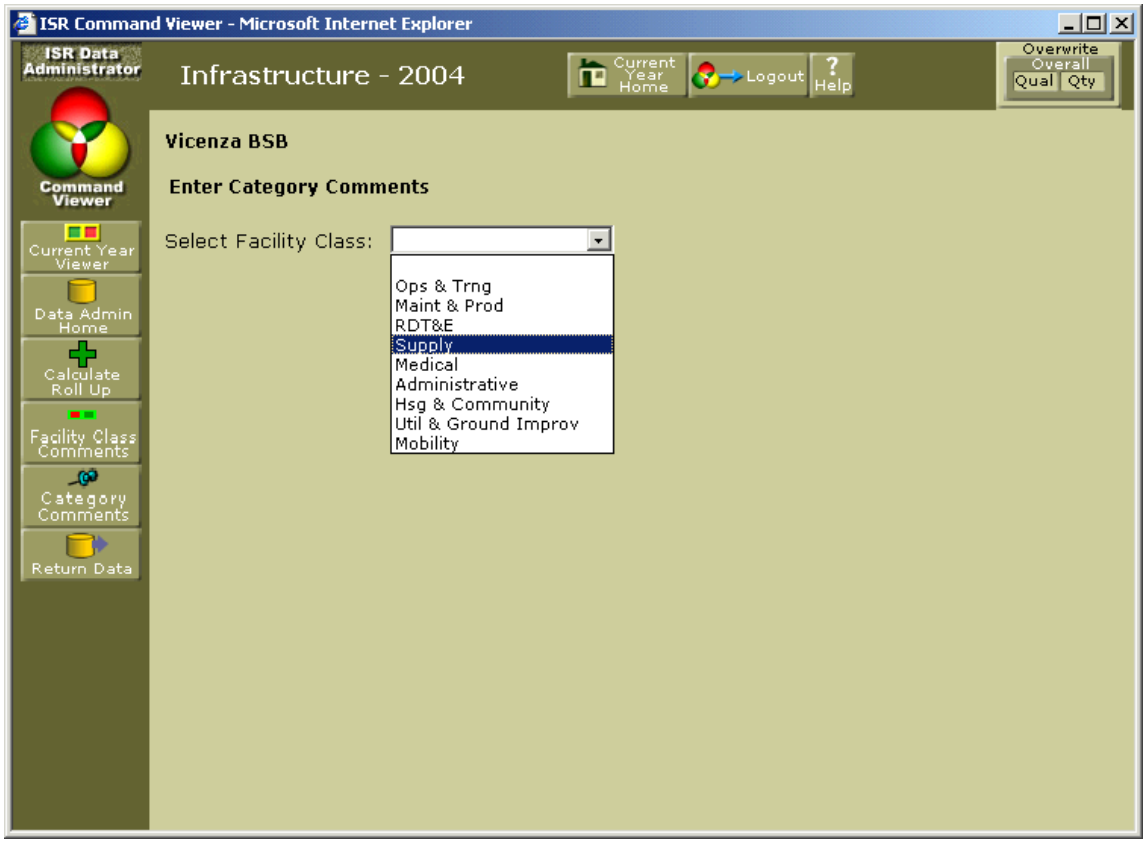
Comments and Overwrites



- ***Click the Edit link next to the Facility Class name for which you want to comments.***
- ***Select Overwrite rating (Optional)***
- ***Enter comment in the text box (required if an Overwrite has been entered).***
- ***Click Save to keep the Comments and/or Overwrite rating or Cancel to delete.***

CV - Data Administrator

Comments and Overwrites

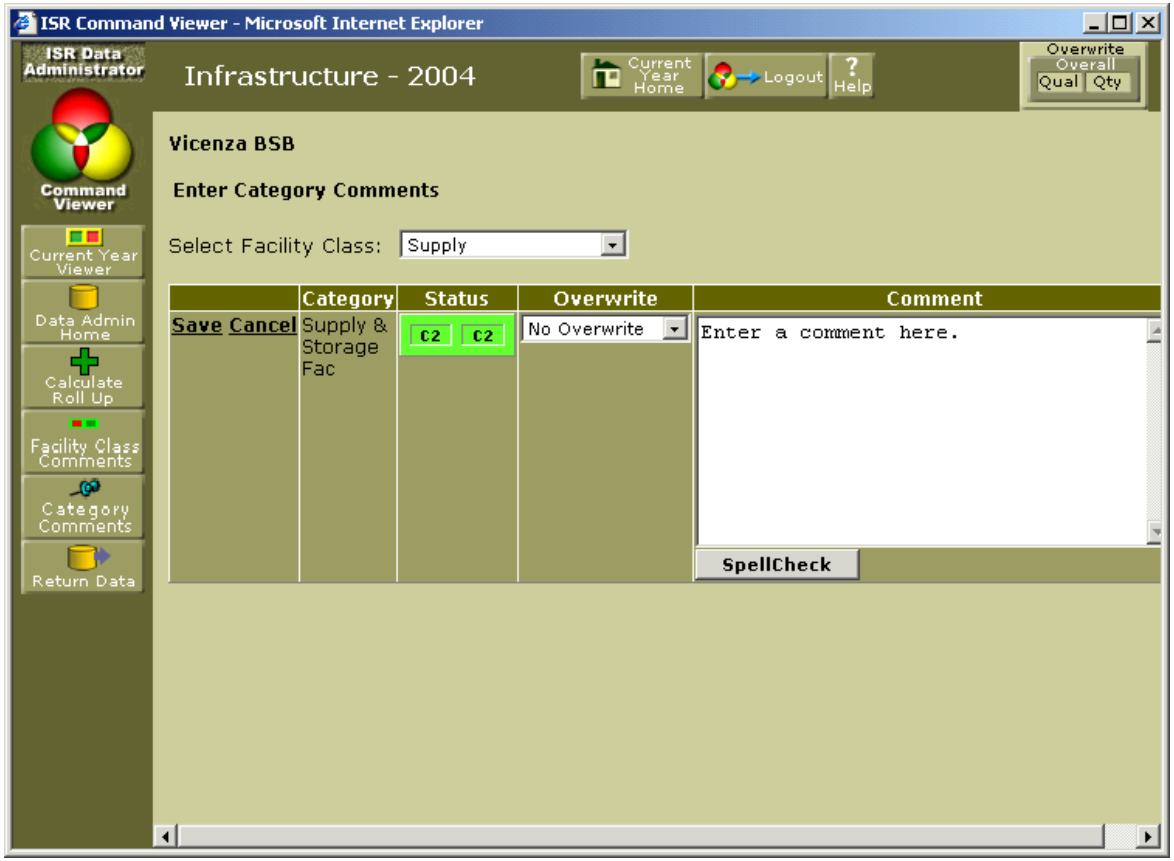


Category Level Comments

- ***No overwrites, just general comments.***
- ***Click the Category comments button, then pick the Facility Class from the drop down list on the page that appears***

CV - Data Administrator

Comments and Overwrites

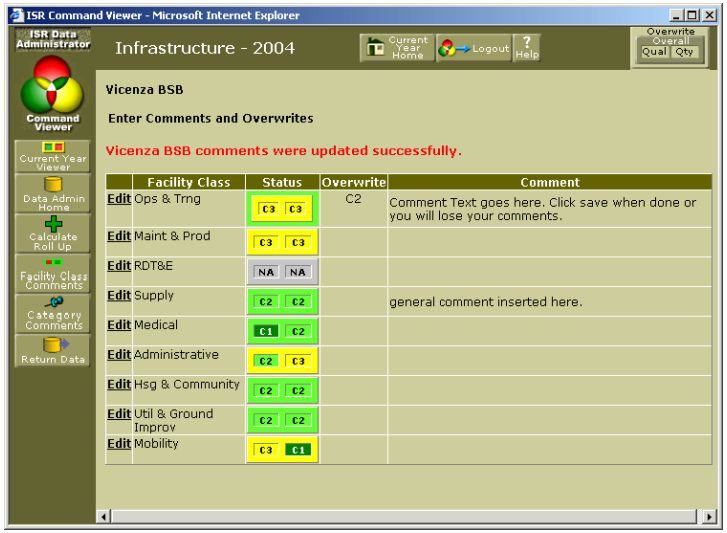


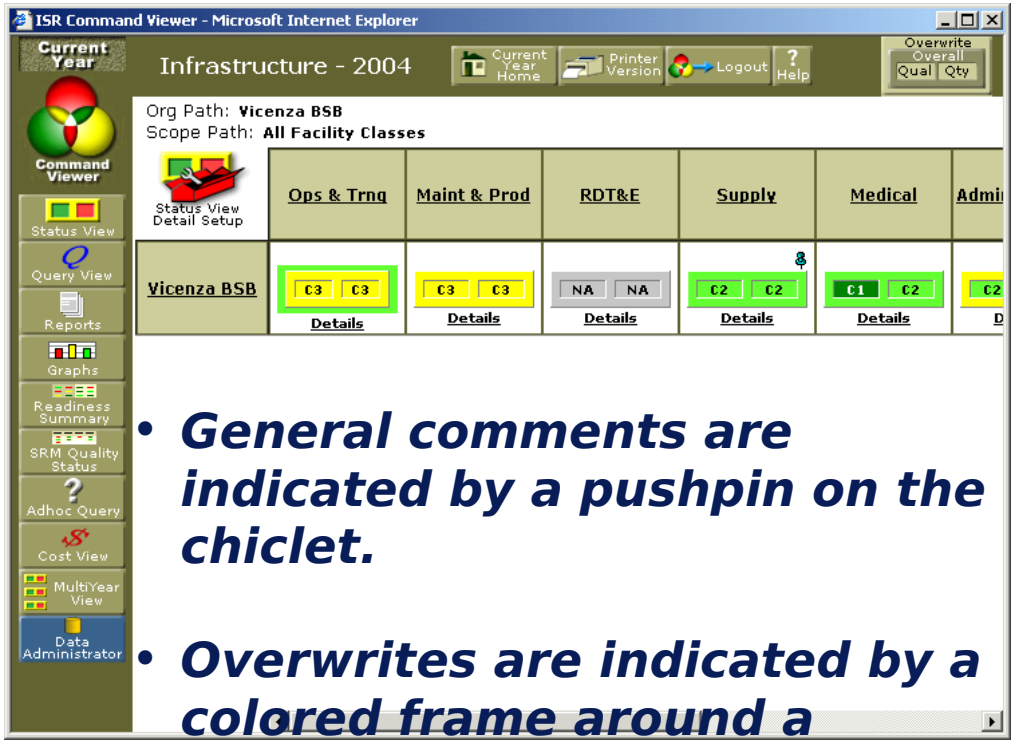
Category level Comments

- *Process works the same as Facility Class comments*
- *Click the Edit link next to the Category name and enter comments into the text box.*
- *Click Save to save the comments.*

CV - Data Administrator

Comments and Overwrites

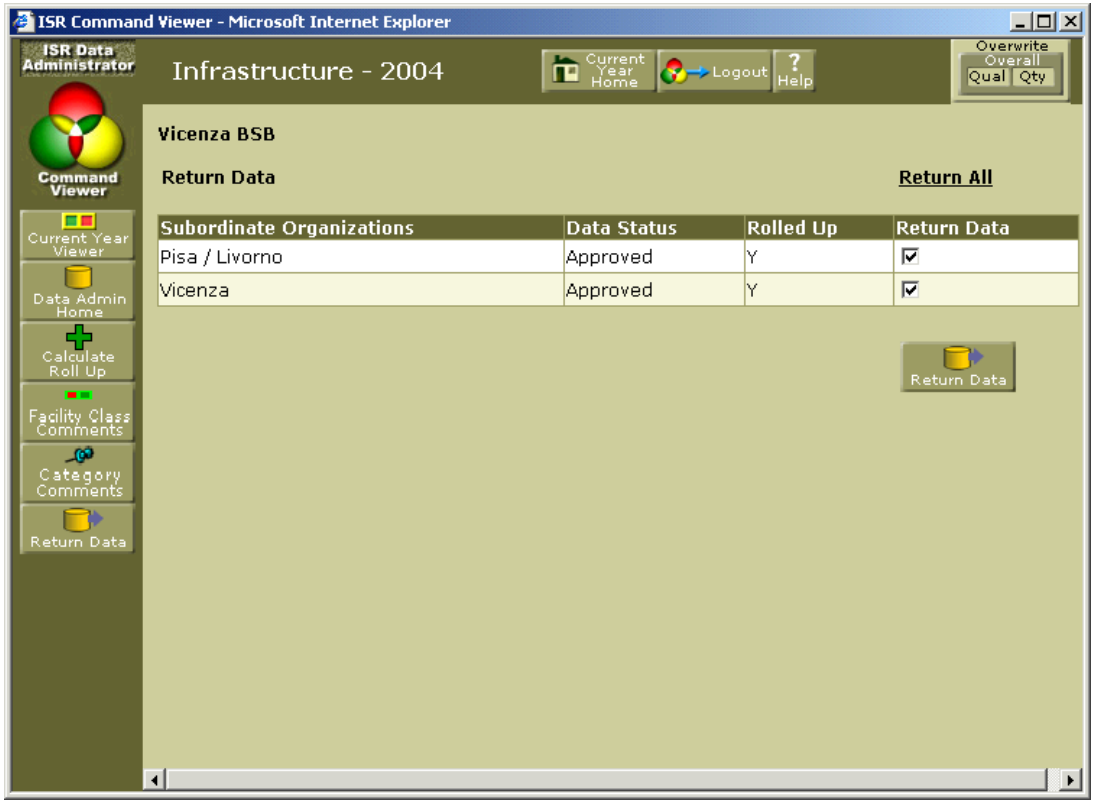




- ***Comments saved successfully.***
- ***Future edits can be made by clicking the Edit link next to the Facility Class/Category name.***
- ***General comments are indicated by a pushpin on the chiclet.***
- ***Overwrites are indicated by a colored frame around a chiclet***

CV - Data Administrator

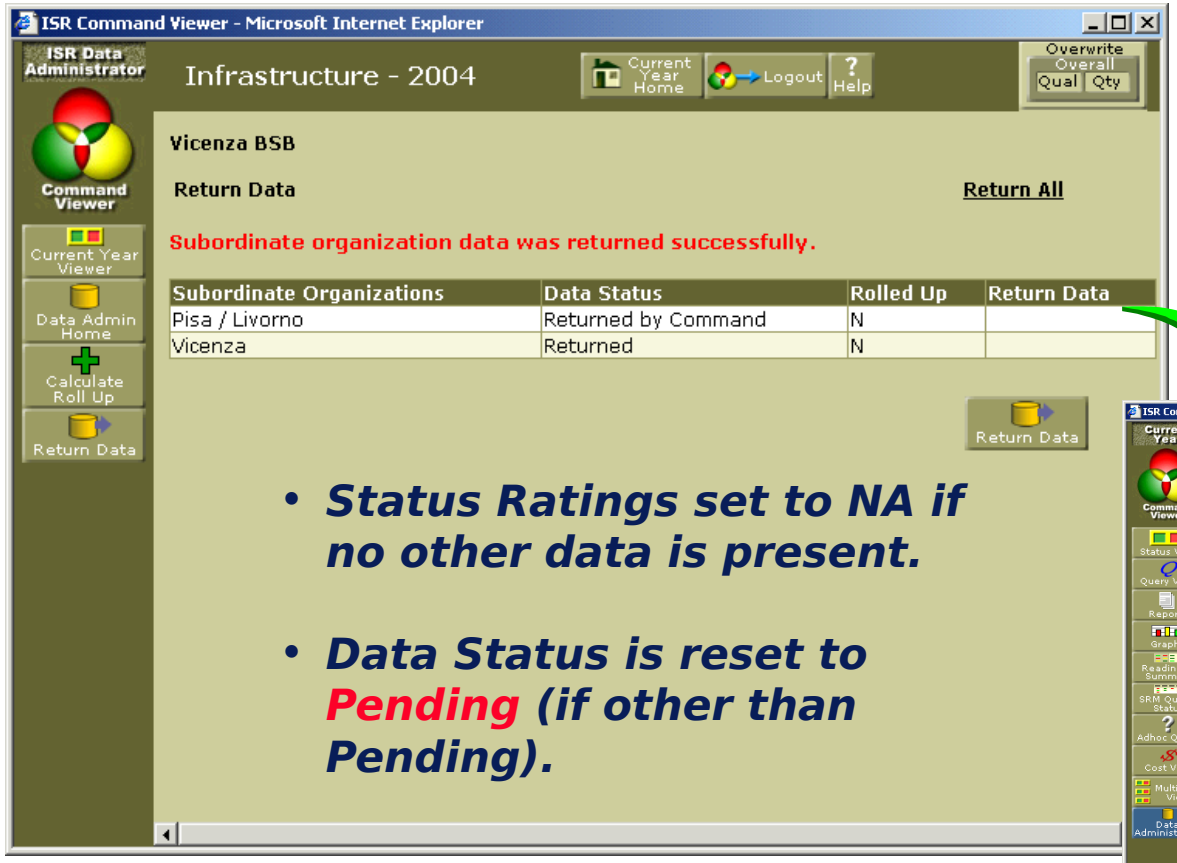
Return Data



- ***Return data to immediate child orgs for correction or revision.***
- ***Return Individual Orgs using the check boxes or click the Return All link, then click the Return Data button.***

CV - Data Administrator

Return Data

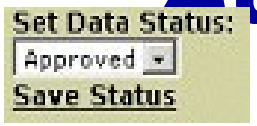


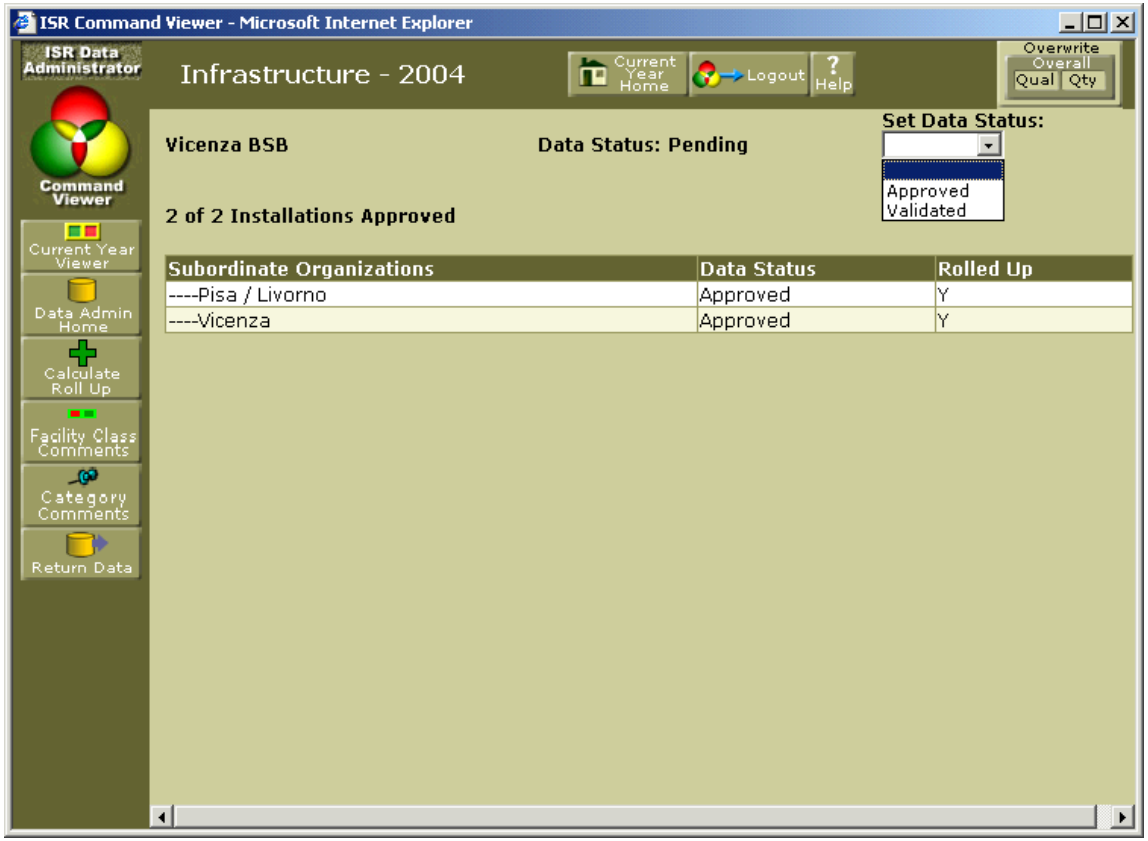
- ***Status Ratings set to NA if no other data is present.***
- ***Data Status is reset to Pending (if other than Pending).***

- ***Data Successfully returned.***
- ***Returning data triggers a recalculation of Status Ratings minus the returned***

CV - Data Administrator

Set Data Status





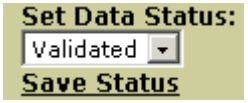
Setting the Data Status is the final step in the process.

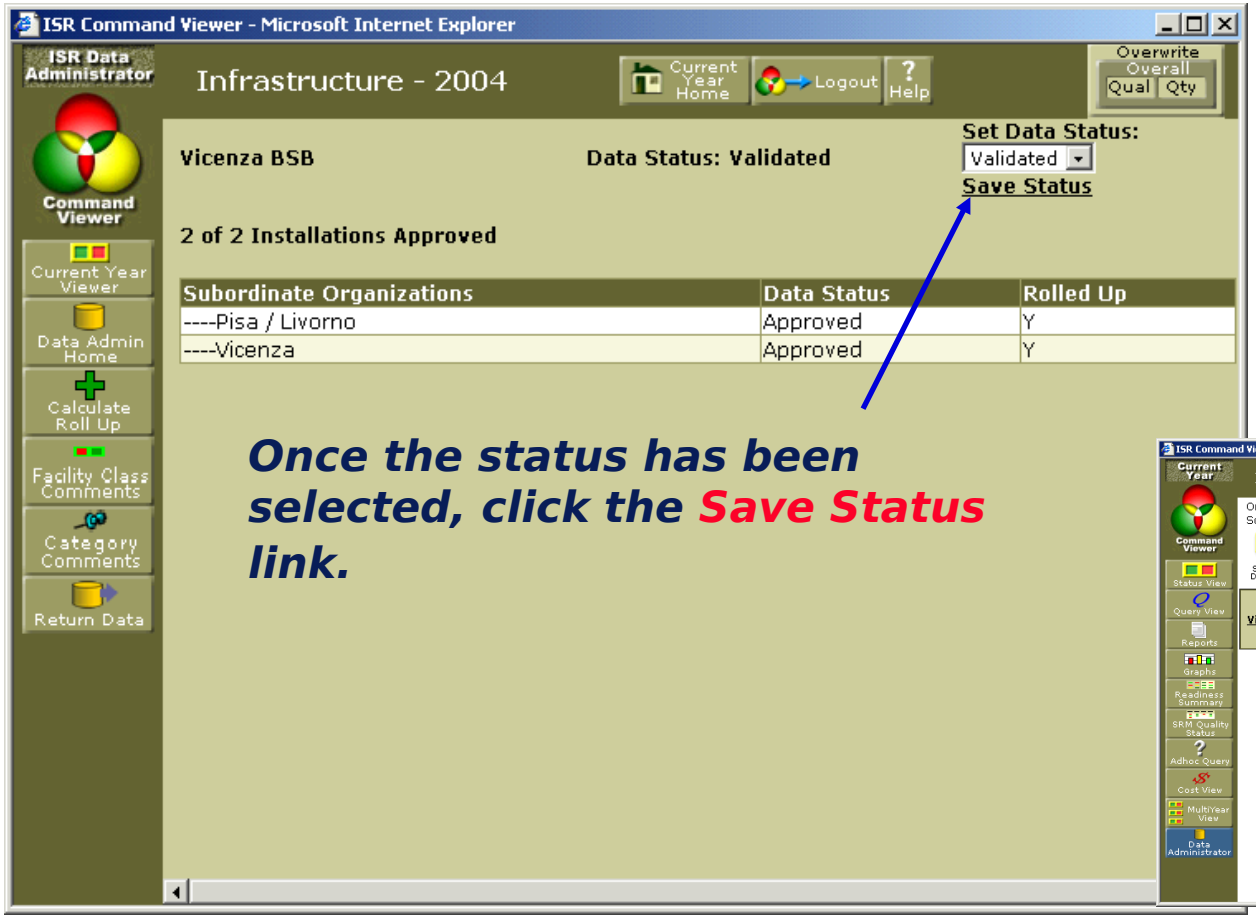
At Command level you have two choices:

- ***Validated***
- ***Approved***

CV - Data Administrator

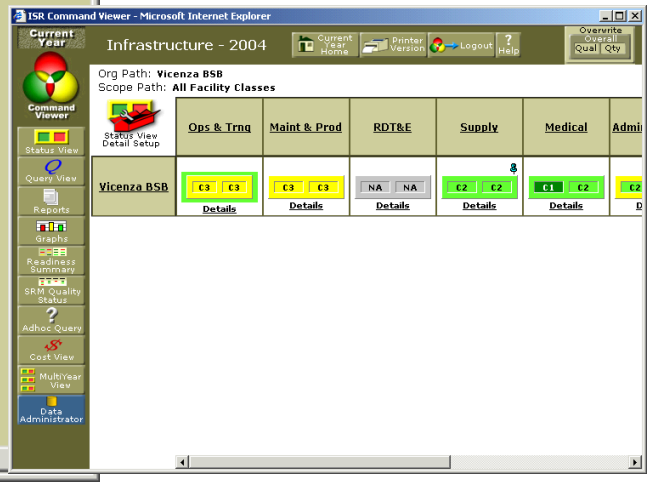
Set Data Status





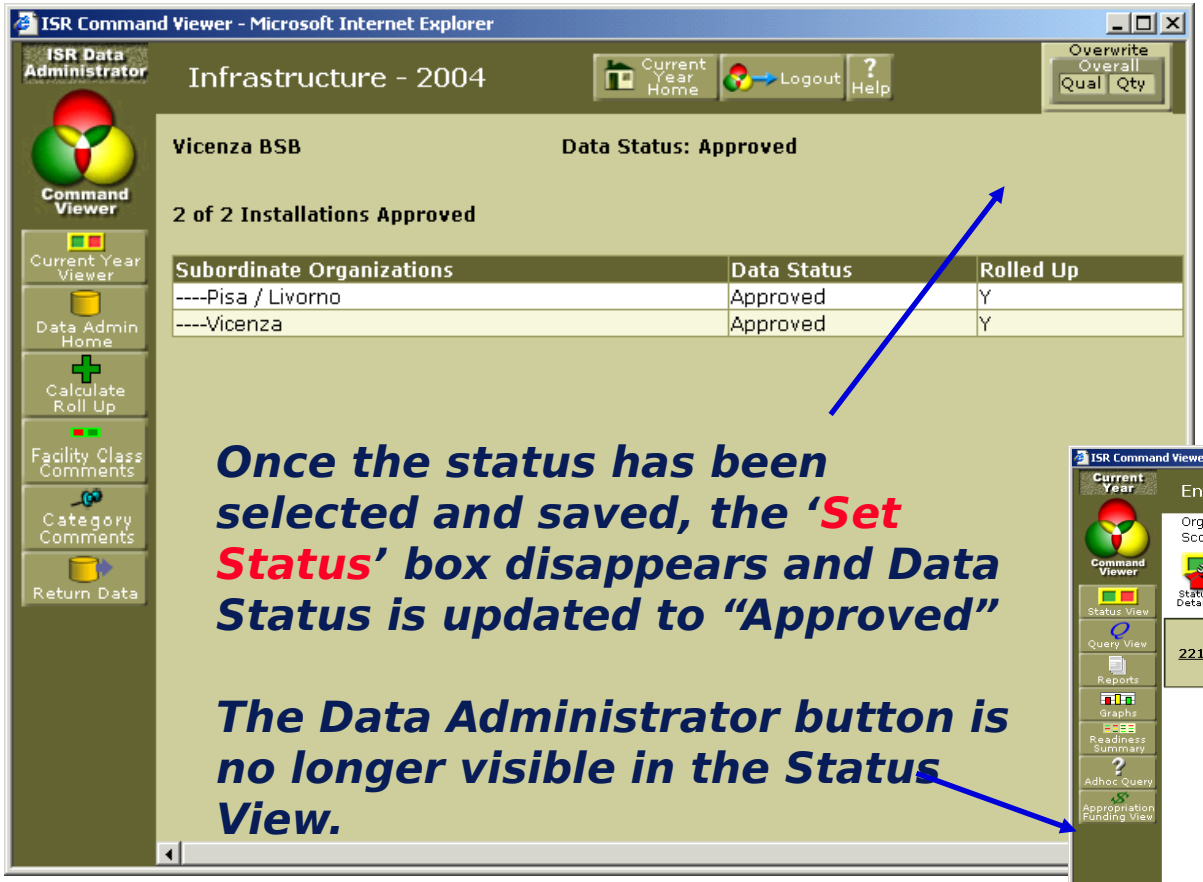
Once the status has been selected, click the Save Status link.

Setting Data Status to "Validated" means that all child data is present, approved and has passed QA/QC. Changes can still be made to the data, and the Data Admin button is still present in the



CV - Data Administrator

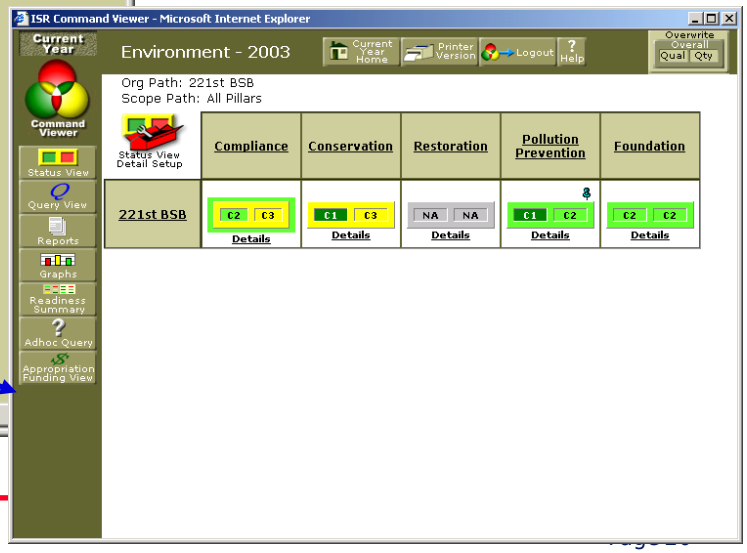
Set Data Status



Setting Data Status to "Approved" ends the Data Admin Process at the Command level, and makes the command's data available to the next higher HQ.

Once the status has been selected and saved, the 'Set Status' box disappears and Data Status is updated to "Approved"

The Data Administrator button is no longer visible in the Status View.



CV - Data Administrator

- *Status View. Displays C-Ratings for User's org and Child Orgs*

- ***Env Only -** Review/Reassign Command Specific EPR Media Assignments and import Command Specific EPR Data*

- *Main Data Admin Screen: View Child Org Status, Set Data Status*

- *Calculate ratings*

- *Enter comments and overwrites at Pillar Level*

- *Enter comments at Media Level*

- *Return Data to child orgs for revisions*

- *Set Data Status to **Validated** or **Approved**.*
